

5 Gallon Bucket Printer - Multi Colors

Graphics International Group has been delivering Screen Printing Machines to the USA Market Since 1984. Our latest development is a Multi-color Screen Printing Machine for Containers up to 5 gallon. Graphics has delivered a number of these machines for containers, similar to the ones above, in up to 6 colours.

Unlike offset printing, the screen printed bucket will give outdoor light fastness, making the end product much more saleable than the offset equivalent.
